

telent Cloud Services – Backup as a Service.

The latest compute and storage technologies allowing your organization to deal with the challenges of the digital economy and improve total cost of ownership. With a track record of providing IT solutions, trust telent to provide the latest technology with platform SLA of 99.999%.

telent Cloud Services Backup as a Service (BaaS) utilises the latest technologies to provide on and off-premise managed backup solution for physical and virtual environments on customer sites. It provides an easy way to restore critical data and systems locally and remotely in the event of accidental deletion, application corruption, system failure or full-blown disaster.

Service Overview - Backup

No need to backup on premise, backup completely in telent Cloud Services and gain offsite data protection guaranteed in the UK.

The service can be extended to provide full disaster recovery with custom options to a market leading 99.999% SLA.

The foundation backup service provides an on/off premise managed backup both for physical and virtual environments. The solution provides easy to use restoration of data and systems locally and remotely, giving protection from accidental deletion, application corruption, system failure or indeed a full blown disaster.

Service Overview – Disaster Recovery

telent Cloud Services provides a further level of protection through the fully managed Disaster Recovery as a Service. This service not only provides a level of assurance of backup but also provides assurance that a customer's IT services work when they are restored remotely along with verification of Recovery Points (RPO) and Recovery Times (RTO).

This is an automated service and predefined to run at regular intervals, typically monthly to meet regulatory requirements in certain organisations.

Pricing

Backup pricing based on an all inclusive per GB per month. Storage tier pricing includes object storage for longer term storage.

Why trust telent?

With full data centre operations in the UK all processes and data resides in the UK. All data is encrypted in transit or at rest. With the ability to replicate to dual data centres all data can be backed up and protected in the event of a disaster.

Summary

telent Cloud Services are a portfolio that provide a range of solutions to meet the needs of the digital economy. Through best in class data centre facilities, security and partner accreditations, telent can underpin your IT requirements. From 'Concrete to Cloud' telent provides the

infrastructure that is taken for granted, in telecommunication networks, from rail, to motorways, and traffic lights and managed services to the emergency services. telent is literally inside the UK infrastructure.
