telent
talent with technology

Cloud Services to meet the needs of the digital economy.

Through best in class datacentre facilities, security and partner accreditations, telent can underpin your IT requirements. From Concrete to Cloud telent provides the technology underpinning infrastructure that is taken for granted, from telecommunication networks, from rail, to motorways, to traffic lights and managed services to the emergency services, telent is literally inside the UK infrastructure.

telent understands what it takes to be always on in the digital economy. We call it the 6 S's of Success. We provide Security, Scale, Speed, Stability, Simplicity and Support. With security at the core of our processes and technology, the ability to flex with you, the latest technology supporting faster processing of data, market leading 99.999% service level availability, easy to understand commercials and propositions and 24x7x365 UK support. No wonder customers from UKs essential services entrust telent.

Security

The whole of telent Cloud Services has been built to the latest NCSC/CESG Architectural patterns. Physical security with PASF assessed datacentres.

Security at every level and in every process. Secure connection supporting MPLS, IPsec encrypted private access, with resilient and diverse fully managed connections. Add to that a PSN accredited platform for the public sector. Secure Infrastructure for the latest technologies for virtual firewalling at every tier, stateful firewalls, secure storage data encrypted to AES256 and customer data encrypted throughout.

Scale

telent Cloud Services provides a range of services from compute and storage to backup as a service to applications. Designed with a 10GigE port structure providing high throughput and content delivery network (CDN) ready. Whether it be compute or storage resources they can be scaled to meet your needs. The provision of Object storage technology meeting the increasing scale requirement of digital assets storage.

Speed

Our investment in high throughput high bandwidth CDN ready architecture is matched by the latest high speed compute technologies with Synergy from our partner HPE. With software designed intelligence, fully automated recovery resources scale fast between frame, rack and row.

Stability

With a dual homed site resilient datacentre infrastructure, utilising the latest 'always-on' technology from HPE Synergy we offer a 99.999% Sla. All services are supported by our 100% UK based 24x7x365 managed services.

Simplicity

telent recognize that getting the right solution for your IT needs can be complex. Our engagement model with clear pricing, bid processes, account management, and pre-sales expertise is all designed to help. With customer portals available to enable service management and 24x7x365 UK support, your management burden is reduced allowing you to concentrate on your business.

Support

telent truly is a UK operation with 100% UK based processes and personnel to support the telent Cloud Services. Not only do we provide UK data sovereignty so is all our support. As well as specialist 24x7x365 network operating centre and close partnership with our partners HPE, Juniper and Vmware ensure technical support is always at hand.

Summary

From Concrete to Cloud telent provides managed services to a diverse range of customers, all with mission critical needs. telent Cloud services is a range of solutions that allows the IT professional to engage with the challenges of the Digital Economy. The 6 S's of success are at the core telent's proposition for Cloud Services, leveraging our 29 year history in providing IT services.
