

CRITICAL VOICE COMMUNICATION

New Fireground Radio developed
in conjunction with East Sussex FRS

"Crucially, this solution will enhance communications between firefighters on the ground.."

Richard Fowler, Assistant Director,
Operational Support and Resilience, at East Sussex FRS

New Fireground Radios from Telent and Tait Communication, developed in conjunction with East Sussex FRS with a simple goal. Meet the needs of firefighters on the incident ground and improve voice communication.

Radios are available in both ATEX and non-ATEX options, with a range of accessories specially designed for fireground roles. Analogue and digital modes are supported to allow easy integration and transition from legacy solutions.

HEAR THE DIFFERENCE
